## ABOUT ME

Full Stack Developer in the making with a knack for building things that live on the internet. I spend my days (and sometimes nights) diving deep into the entire development process, from crafting intuitive interfaces to making sure the logic behind the scenes is solid and scalable. For me, coding isn't just about syntax; it's about solving puzzles and constantly learning new ways to build better, faster, and smarter. I'm ready to bring my energy and my code to a team that's building something cool.

## PROJECTS

### My first Web

Developed a multi-page interactive website dedicated to music artists, marking my first hands-on web development project built entirely from scratch. I implemented a clean, semantic architecture with modern tags and a complete navigation flow linking a central dashboard to detailed individual artist profiles. The project features responsive Flexbox layouts, interactive UI elements with CSS transformations and hover effects. Additionally, I applied advanced styling techniques such as Google Fonts integration, fixed backgrounds, and translucent UI components to create a modern, visually engaging interface while effectively structuring complex data like discographies and tour dates using tables and lists.

### Portfolio Web

Design and development of a professional portfolio from scratch to showcase my Full Stack Developer profile. The project features a multi-page architecture structured with semantic HTML5 and styled with Vanilla CSS3. It highlights advanced use of Flexbox for fluid layouts, interactive UI components (such as progress bars and forms), and a strong focus on code quality, maintainability, and User Experience (UX).

## EXPERIENCE

### Supermercats Bonpreu i Esclat

#### Traffic Supervisor

2021 - 2024

Managed logistics for home deliveries, acting as the key link between the warehouse, drivers, and central dispatch. Maintained effective communication across departments to streamline loading processes and coordinate schedules. Managed fleet maintenance and safety compliance using ERP software for real-time tracking, while resolving customer issues and analyzing KPIs with Excel to optimize performance.

#### Driver

2020 - 2021

Executed busy delivery schedules, prioritizing punctuality and efficient routes. Handled delivery challenges independently to ensure a positive customer experience, while always maintaining strict safety standards.

### Gap Year

2018 - 2019

What began as a search for perspective became the most rewarding and complex adventure of my life; a journey that redefined how I approach any challenge. The greatest challenge of this experience was crossing India from north to south entirely by land. It was a three-month journey that demanded constant planning, the ability to improvise, and absolute resilience in the face of ever-changing environments. I completed this feat alongside a prior stay in the Nepalese Himalayas, followed by a month exploring Sri Lanka and a route through Malaysia, Singapore, and Thailand. I finally concluded the journey back in the breathtaking Himalayas. This adventure was a period of profound personal growth that provided me with maturity and key skills such as decision-making under pressure, managing limited resources, and adapting to the unexpected without losing focus.

## SKILLS

### Programming Languages

HTML, CSS, Python, R, Java

### Databases

SQL, MySQL

### Data Processing & Visualization

Pandas, NumPy, Matplotlib, Seaborn

### Machine Learning & AI

Scikit-learn, OpenCode

### Tools & Technologies

Git, VSCode, Jupyter Notebooks

## EDUCATION

### Bachelor's Degree Data Science, Universitat Oberta de Catalunya

2025 - Present

### Architecture, Universitat Ramón Llull, La Salle

2009 - 2015

### High School Diploma, Technology, SEK International School

1997 - 2009

## LANGUAGES

English – Proficient

Catalan – Native/Bilingual

Spanish – Native/Bilingual

## COURSES

### Full-Stack Web Development, Ironhack - SOC

### Data Science & Machine Learning, 4Geeks Academy

### Java programming, CIFO

### Python programming, CIFO
